Subject: Goodbye

Hi Warren

I said I'd write to you on Wednesday - sorry for the delay. I do hope that everything goes well with your projects. Chris will stand you in good stead and although we didn't have time to look at migration in particular I'm sure he'll be able to help better than I could. Anyhow, if anything was missed you can contact him. Keep up the good work in getting things onto ACCESS - APL is such a prison for data. Thanks for your very kind words on the card. All the best for the future.

Goodbye, Keith
