Sir,

Thank you for letting me know about the limitations of the Members of the Legislative Assembly regarding legal matters (July 4, 2011). I very much appreciate your prompt responses and good work from you and your office and your understanding regarding the issues I have raised.

Thank you also for having forwarded my letter of March 18, 2011, to the BC Public Service Agency (PSA). My understanding is that the PSA is concerned with personnel issues; however, the real methods used to create BC's Official Population Statistics numbers are also an issue of importance to the service provider.

These numbers are important as they are used to justify the opening and closing of public, and private facilities (including permanent closure of public schools); establish electoral boundaries; as well as municipal insurance rates, and electrical generations and transportation needs, to name a few applications.

Therefore, would it not also be appropriate to forward concerns to the Ministry responsible for the quality of BC's Official Population Statistics, as well as to the users of the population numbers? Could you please forward these concerns to the Minister and Ministry responsible for the reliability of BC's Official Population Statistics?

Also, it appears that there may be need to address legislation, since it appears that services may not be corrected simply because issues were raised by an employee who was then dismissed and denied arbitration into the real matters in dispute after being accused of making co-workers fear for their safety and thereafter, for following incorrect procedures. In my case, I was told by the BCGEU Shop Steward, Marvin Paxman:

"So far there is nothing that they [management] are aware of that can be applied to this situation."

Is there really nothing that the provincial government management can apply to this situation?

Yours truly,

William Warren Munroe
