Thank you for your message regarding your challenges with your past employment. We appreciate your providing the MLA with information regarding your situation. MLA must necessarily refrain from any case that involves the law, litigation, labour, land or issues with legal implications. This is an important principal and is strictly followed by all MLA's offices and staff. We have attached a guidebook for Employment standards and you may want to get your union representatives' help or support and or some type of professional guidance to assist you in resolving your issues with your past employment.

Yours sincerely
